1. The Ketschendorf Steel Castings Plant, south of Fürstenwalde-Spree, employs 389 men. Its officials are as follows:

Director: Kleinfeld  
Technical Director: Schiller  
Plant Engineer: Haake  
Purchasing Division: Müller  
Sales Division: Werner  
SRD Shop Group: Neumann, Vogler, Wolf, Marx

2. The plant has three cupola furnaces, two converters for the production of mild steel by the air refining process, and three moveable cranes. The two converters have a capacity of 1600 - 2200 kilograms. As of January 1950 the plant had a monthly capacity of approximately 220-230 tons, and January production was 227,143.15 kilograms with 8,884 kilograms of waste. The plant is suffering very severely from the delay in raw material deliveries, principally "Hammatit". For this reason production was already deferred for three days in February 1950.

3. Ketschendorf's deliveries completed during January 1950 are as follows:

	Model Number	Number of Pieces
<b>Mühlenbau Zschachwitz</b>		
Rolled beams, (Walzenträger)	150136	20
Rolled beams	150137	18
Large coupled wheels	150146	9
<b>Maschinenbau Germania - Chemnitz</b>		
T pieces	RK 151	5
Flanges	RK 152	26
Clamp halves (Schellenhälften)	RK 156	24
Covers	RK 153	8
